of
Respiratory Medicine**

Dear Friends,

It gives me immense pleasure to invite you to "**Master class: ICU Bronchoscopy and More**" workshop on **4th November 2023**. The purpose of the workshop is to train pulmonologists, intensivists, and postgraduate trainees in how to do bronchoscopy, know the anatomy of the airways, insert central and arterial catheters, difficult airway intubation, and percutaneous tracheostomy. We also have a workstation on how to put indwelling pleural catheters and intercostal drains. We intend to train participants about handling of the bronchoscope, basic techniques of BAL, and advanced training for difficult airway percutaneous tracheostomy.

At the end of the course, the participants will be able to describe the anatomy of the bronchial tree, will able to understand how to perform bronchoscopy and other allied maneuvers like removal of secretions for diagnostic and therapeutic purposes, how to put arterial and central catheters as well as a percutaneous tracheostomy tube. The course will also include step-by-step training on entering the upper airway and the bronchial tree on an anatomic model/virtual reality bronchoscopy simulator. There will be hands-on training for all the procedures on mannequins/simulators by experts.

Looking forward to your esteemed presence!

Patrons :

Dr Prem Nair, Medical Director, AIMS

Dr Gireesh Kumar KP, Principal, AIMS

Dr Beena KV , Additional Medical Superintendent
